HENESA - HENEMAQ

Consortium of industrial machining, design and manufacture of devices, gauges, spare parts, welding and high quality industrial services.

MISSION

Design, manufacture and offer quality services, working focused on meeting the expectations of our customers, working as a team and promoting continuous improvement.

VISION

To be a company recognized by our clients, for the quality of its products or services, integrating objectives and goals of our clients, with teamwork.

OUR SERVICES

- DESIGN**
- LASER CUT**
- CNC BENDING**
- PAILERY AND WELDING**
- CLEANING OF PAINT BY PYROLYSIS**
- MANUFACTURE AND MAINTENANCE OF JIGS**
- MACHINING CNC**
- ELECTROSTATIC PAINTING LINE**
- MANUFACTURE OF ROBOT ANTISTATIC COVERS**

INDUSTRIAL DESIGN

We offer our clients objective and innovative solutions, capable of fully satisfying the needs of the industry. Likewise, we develop alternatives in the responses of technical-technological conflicts, balancing the benefit between the industry and the environment. We seek optimization in the creation of complex mechanisms and systems.

- Rapid manufacturing of prototypes.
- Process planning.
- Tool design.

BACKGROUND

MACHINING SERVICES

-CNC MACHINING

COMPUTERIZED NUMERICAL CONTROL
EQUIPMENT (CNC)

-ELECTRO-EROSIONED

IN PENETRATION EROSION EQUIPMENT

-RECTIFIED

-IN EQUIPMENT FOR GRINDING FLAT
SURFACES

-TURNING EQUIPMENT

-IN TURNING EQUIPMENT

-MILLING EQUIPMENT

IN MILLING EQUIPMENT

MACHINING SERVICES

OTHER SERVICES

MANUFACTURE AND DESIGN OF OPERATING CELLS

DESIGN AND MANUFACTURE OF PUNCHING
TABLE FOR DOUBLE CABIN ROOF PICK UP

DESIGN, MANUFACTURE AND MAINTENANCE OF JIGS

- Design
- Manufacturing
- Cleaning jigs saturated with paint
- Thermal and chemical process from an M3 screw, to a Dolly to move a vehicle.
- Repair, change of parts, improvement of designs, recovery with welding and inspection of parts

SPRING JIGS WITH IDENTIFIER

MANUFACTURE, MODIFICATION AND DESIGN OF DOOR FRAMES 403, 405 AND 407

MODIFICATION OF PANTO JIGS

Manufacture of paint jigs for FR and RR bumper

DOOR HOOK (METAL TO STAMP)

FEM

FRONT END MODULE (FEM)

BACK DOOR STOPPER ED RH

DOOR JIG SEAL TO TRIM

BACK DOOR STOPPER ED L

SLIDE DOOR ED LOCK

DOOR HANGER LH

SLIDE DOOR JIG(FOR BODY)

DOOR HANGER RH

SLIDE DOOR RR ROLLER FIX JIG

HOOK

CHEST ROD FOR SEAL

HOOD HANDLE

CHEST ROD FOR FILLER AND ENAMEL

BACK DOOR HANDLE

CHEST TOP

BACK DOOR HAND

FLOATING JIG

DOOR BELT

FR BMPR

MANUFACTURE OF STRUCTURES AND DOLLIES

STRUCTURE FOR CONTROL PANELS

DOLLY MANUFACTURING FOR ENGINE
SUBASSEMBLY

PIPE RACK

MANUFACTURE OF ROLLER CONVEYORS

MANUFACTURE OF INDUSTRIAL PLATFORMS WITH STAINLESS STEEL COATING

MANUFACTURING OF GUARDS AND PROTECTIONS

HENEMAQ S. DE R. L. DE C. V.

SPECIAL MANUFACTURING OF SUNROOF TOWERS, ACCORDING TO THE CUSTOMER'S NEEDS

MANUFACTURE OF ANC DOLLYES

COMP CART MANUFACTURING

MANUFACTURING OF CHUTERS

DRAGING CLIPS MANUFACTURING

HENEMAQ S. DE R. L. DE C. V.

MANUFACTURING AND REPAIRING OF MONSTER JIG

MANUFACTURING OF GAUGES

PAILING AND WELDING

- OXYACETYLENE WELDING EQUIPMENT
- MILLERMATIC 212 WELDING EQUIPMENT (MICRO WIRE)
- MILLERMATIC 210 WELDING EQUIPMENT (MICRO WIRE)
- EQUIPMENT FOR INFRA WELDING M12-300
- RAYOMEX 15KVA SPOTTING MACHINE
- EQUIPMENT FOR INFRA WELDING MI-225L
- KRESS C100-6B THERMAL T. OVEN
- SAND BLAST TEAM

- CPA base structure and dust extraction (mist collection)
- Case Stainless steel works
- Structure for dollies for AGV

LASER CUT

TRUMPF 1030 2000 W LASER CUTTING EQUIPMENT

TruLaser 1030 has a capacity of 2000 watts of power cutting thicknesses from .5 mm to 16 mm in carbon steel, from .5 mm to 5 mm in aluminum and stainless steel; The cutting table measures 3600 mm x 1600 mm, to generate the cut we have the following types of gas: air, oxygen and nitrogen.

LASER CUT

TRUMPF TRULASER 1030 LASER CUTTING EQUIPMENT

LASER CUT

CNC BENDING

- TRUBEND 3100 TRUMPF BENDING EQUIPMENT**

TruBend 3100 features a 110-ton press force and 118-in. bend length in a space-saving design. It comes standard with a 2-axis backgauge, with the option to expand to a 4- or 5-axis backgauge, making it possible to precisely bend parts, even when dealing with complex part geometries. According to the manufacturer, the machine is suitable for precision bending.

CNC BENDING

TRUMPF TRUBEND 3100 BENDING EQUIPMENT

CLEANING OF PAINT BY PYROLYSIS

What is pyrolysis? It is a function that decomposes the remains of dirt on parts and devices, such as grease and paint at high temperatures, organic matter decomposes into CO₂ and water and evaporates, while inorganic matter turns into ash.

Paint cleaning by
pyrolysis process

MANUFACTURE AND SUPPLY OF ROBOT ANTISTATIC COVERS

ELECTROSTATIC PAINT LINE

ELECTROSTATIC POWDER PAINT WITH PROCESSES OF:

-Degrease, Phosphate and Seal
wash and rinse

- ELECTROSTATIC PAINTING BOOTH WITH SPRAY TUB
- CURING OVEN
- CONTINUOUS VARIABLE CONVEYOR
- ELECTROSTATIC POWDER PAINTING BOOTH

**WE DEVELOP EXPORT PROJECTS, PREPARATION
OF DOCUMENTS NECESSARY FOR CORRECT
TRANSPORTATION AND CUSTOMS ACCEPTANCE.**

HENESA

**TOGETHER WE ACHIEVE OUR
GOALS**

QUALITY POLITICS

At HENESA - HENEMAQ we provide our clients with products and services that meet the specifications, supported by our culture of quality, standardization, continuous improvement, environment, health and safety.
